**Byte Classic®**  
**Miracle Integration Guide**

7/19/07

Byte Classic interfaces data to Miracle Online using an application provided by MRG called MRGIFace. MRGIFace is available for download from the Miracle Online website <http://www.mrgdocs.com/BytePro.shtm>.

## Installation and Configuration of MRG System Interface

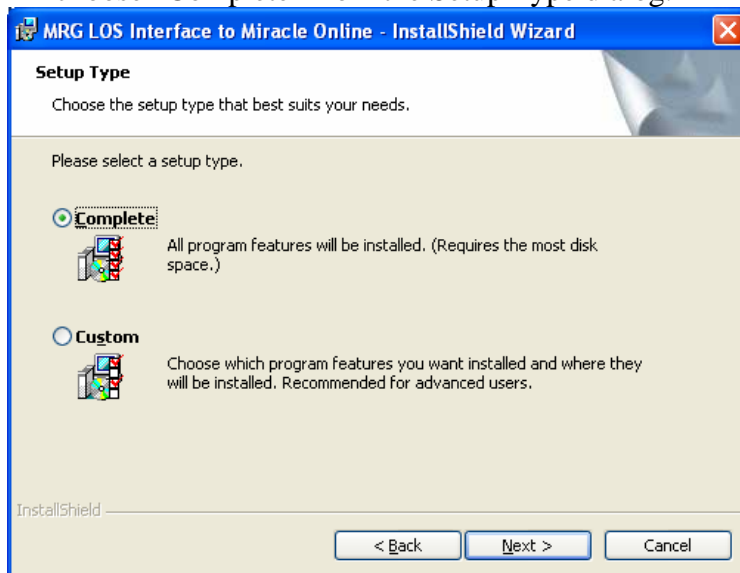

In order to utilize the Byte Classic Miracle Online interface, MRGIFace must be downloaded from the Miracle Online website and installed.

### Installation

Byte Classic places import files into a local directory on the user's workstation, typically "C:\TQS5\Transfer". For this reason, MRG recommends installing each workstation as a Standalone Installation.

### Standalone Installation

1. Download and install MRGFace from **each** workstation running Byte. Installation will require administrative privileges. During the setup process choose "Complete" from the Setup Type dialog.

2. Launch MRGIFace from the desktop shortcut and follow the **Configuration** instructions below.
3. Repeat for all Byte workstations.

NOTE: When ready to export loans, each user will need to start MRGIFace from the desktop shortcut and click "Process".

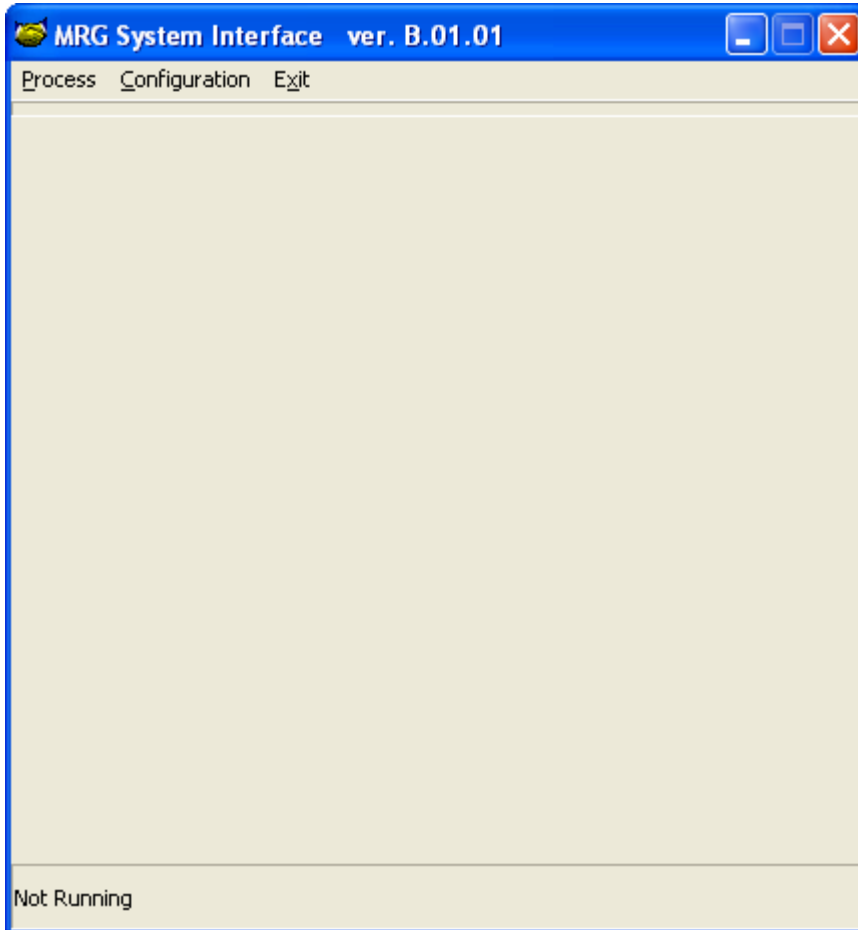

### Configuration

Double-click on the MRG Interface icon

MRG System Interface.lnk

Click “Configuration” to view the current interface settings.

Verify the Import File Location is set to “C:\TQS5\Transfer”.

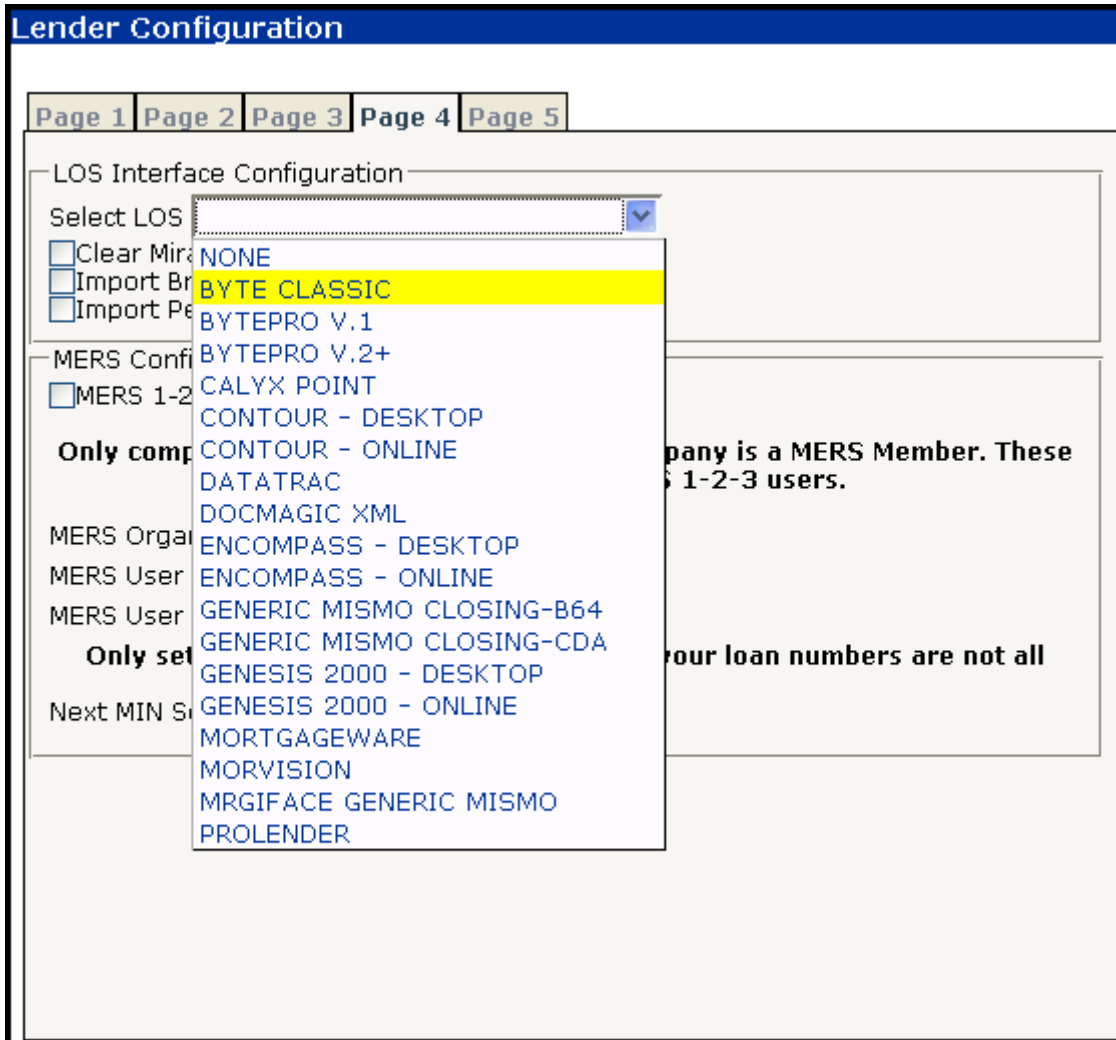

Select “Byte Enterprises (TQS)” for Interface Type, and “MRG Datafile (\*.MRG)” for Interface File Type. Additionally, fill out Client ID, Username, and Password with the information provided by MRG staff. If you would like your web browser to open automatically to the loan file in Miracle Online after importing, ensure the “Open loan after importing” box is checked.

In order to process loans, MRGIFace will need to **remain running** on the workstation. MRGIFace will countdown and check for new files to process every few seconds.

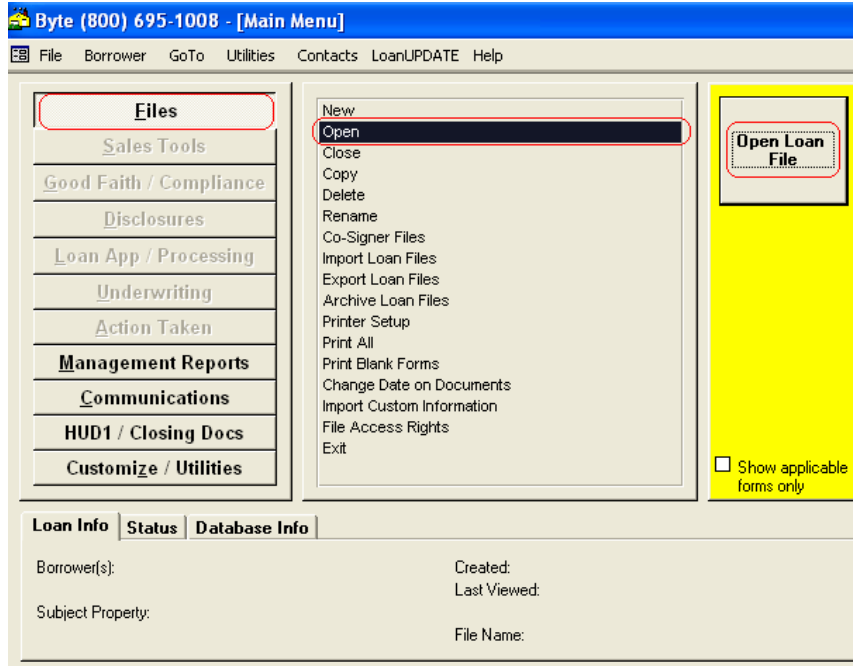

Launch MRGIFace from the workstation running Byte and click the Process button.

Before interfacing a loan from Byte Classic into Miracle Online, ensure your Miracle System Administrator has set 'Byte Classic' to be the LOS in the 'Lender Configuration - Page 4'.

## Exporting Loans to Miracle

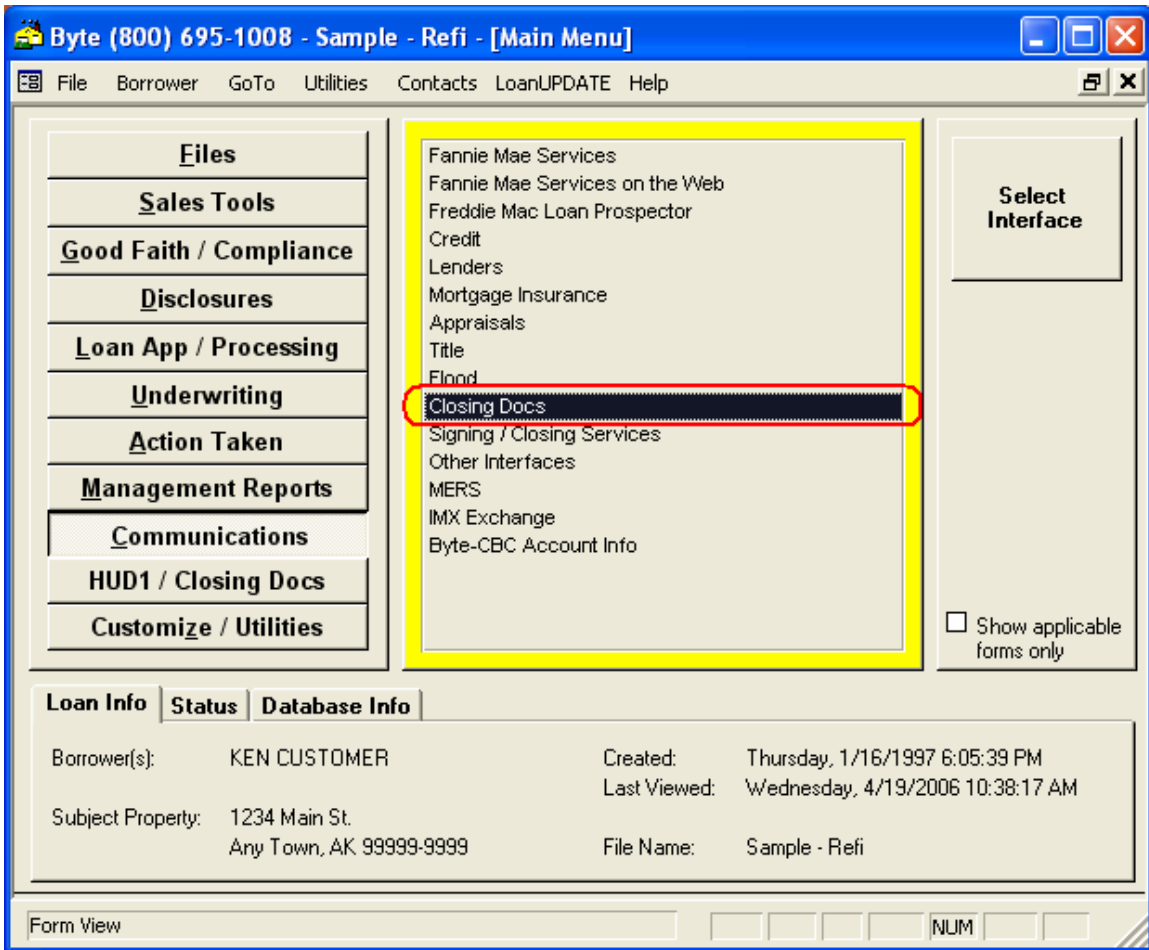

To select a loan file to export click on “Files” button then select “Open” from options list. Now click on “Open Loan File” button.

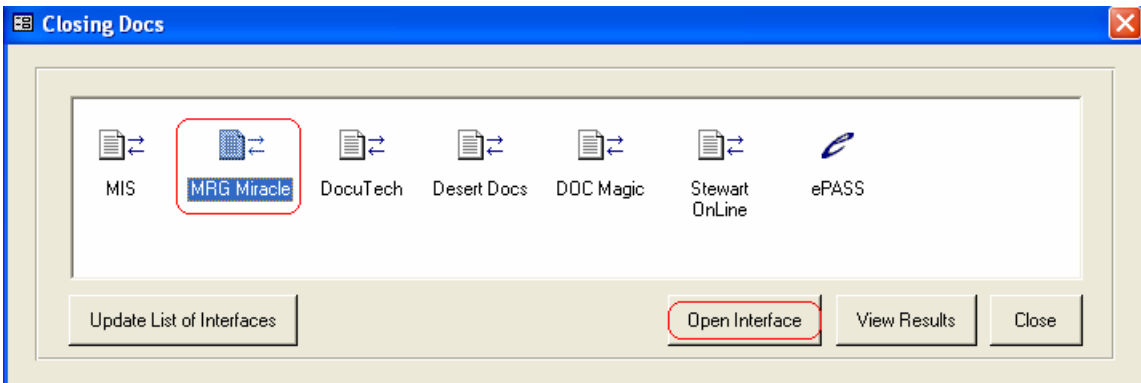

On the new screen select a loan then click on “Open” button.

Exporting a loan to MRG can be done by clicking on the “Communications” button then selecting “Closing Docs” from the drop down list. Now click on “Select Interface” button.

Click on “MRG Miracle” icon then click on “Open Interface” or you can just double click on “MRG Miracle” icon.

Once “MRG Miracle” is selected, the following screen will appear. Click on “Export to MRG” button.

The loan file will be saved temporarily into the Transfer folder.

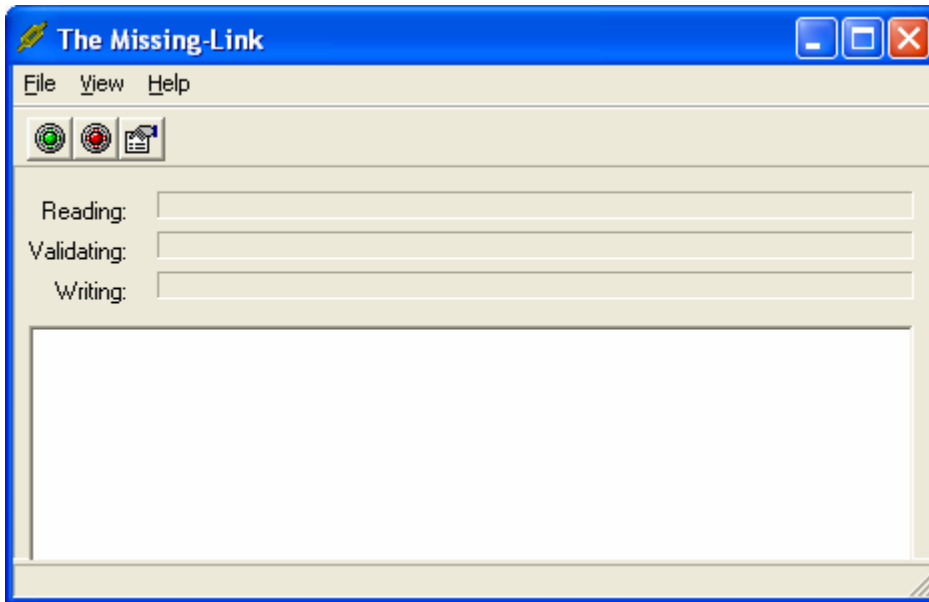

Click “OK” to close box. Click on “Close” on MRG interface box. Click on “Close” on Closing Doc box.

At this point, the MRG System Interface will pick up and process the file.

*\* Drive letters and folders may vary from what is displayed, depending on install path chosen.*

MRG System Interface will launch a program called “TML” (The Missing Link) to assist in the import of the Byte Classic data file.

Once MRG System Interface has processed the file, the loan is available by logging into Miracle Online and accessing it through the Select Loan Screen. If you have enabled the “Open loan after import” checkbox, your web browser will be automatically opened and directed to the loan file that was just imported.

If you are not currently logged into Miracle Online, you will be presented with the following:

You will then be asked how you would like to open the loan.

Select either Upfront/Initial Disclosure Package or Final Closing Package.

Press either Open Using Standard Screens or Open Using Rapid Data

... Standard Screens - opens the loan to the Basic Loan Information (Part 1).

... Rapid Data - opens the loan with a new feature that only displays the remaining required fields to order a loan package.

Pressing Open Using Standard Screens opens Miracle Online into the loan you just interfaced to Basic Loan Information (Part 1).
